

Proposal for an Addition to *The Amateur Radio Lighthouse Society* World List of Lights (WLOL)

Anyone can submit a light for inclusion on the world-famous ARLHS World List of Lights. As long as it meets the ARLHS criteria and is approved by the WLOL Committee, it will be assigned a number and will be added to the list. The Proposer is encouraged to review the ARLHS criteria for a light's inclusion. Basically, the light (1) should be or have been recognized by some government agency as a true navigation beacon, as evidenced by its inclusion in an official government publication, government list of lights, or nautical chart.; and (2) should be large enough to physically support an operator and all equipment necessary to sustain a complete ham station for a period of at least an hour.

This form is to be used by anyone requesting the assignment of an ARLHS number to a light beacon (lighthouse, lightship, etc.) and for its inclusion on the World List of Lights. Please provide as much information as possible, including photographs where possible, and submit via e-mail to lighthouse@arlhs.net or via regular mail to: ARLHS, WLOL Committee, 114 Woodbine Ave, Merchantville, NJ 08109-1854 USA. Note that it is the responsibility of the Proposer to provide sufficient information and proof to the WLOL Committee to warrant and justify the inclusion of the light. After the Committee has researched the data and discussed the pros and cons, a vote will be taken to accept or deny, and the results of the decision will be posted to the BeaconBot and published on the ARLHS WLOL. If you have any questions, contact the Committee at the address above or call via telephone to ARLHS headquarters in the USA at 856-486-1755.

ANSWER AS MANY ITEMS AS YOU CAN, BUT PLEASE PRINT CLEARLY!

Your name: _____ ARLHS Member #: _____

Your call (if any): _____ Your telephone number: _____

Your e-mail address: _____

Your mailing address: Street = _____ City = _____

State/Prov. = _____ Post code = _____ Country = _____

Name(s) of light (some lights have more than one name that they are known by locally): _____

Light's location:

Mailing address (if available): _____

Light's telephone (if available): _____ E-mail address: _____

Nearest town/city: _____

State/Province, etc.: _____ Country: _____

Latitude: _____ Longitude: _____

Government publication, list, chart (be specific and list all available; for example NOAA 21732): _____

Description of light: Height = _____ Color / Markings = _____

Type of construction = _____ Adjacent buildings: _____

Beacon / Type of lens = _____ Year built (if known): _____

Presently operational? ____ Accessible by land? ____ Owned by: _____

PRINT ALL INFORMATION!

Web sites featuring this light (print clearly):

I believe the light I am proposing deserves inclusion on the ARLHS WLOL because:

It is my opinion that this light will support a ham station for transmitting and receiving: _____ (yes)

I am attaching or enclosing _____ (how many?) photographs. Please identify these by the name of the light and not just a file number. Note: Photos sent by mail will not be returned unless an SASE is enclosed. Photos sent by e-mail should be in JPG format and of sufficient quality so as to be able to identify the light and judge its size, etc.
